# Cabinets

## BASIC CARE TIPS

- Wipe up spills, splatters and water spots as they occur, keep the cabinets dry.
- Clean as need with a soft, lint free cloth
- Dry surfaces immediately with a soft cloth
- Avoid using a dishcloth or sponge, because it could contain remnants of grease or detergents.
- Do not use products with bleach, ammonia or abrasive additives.
- Never use scouring pads, steel wool or powdered cleaners.
- Do not allow oven cleaners to come in contact with wood finishes.
- Avoid placing small kitchen appliances where heat is directed onto cabinet surfaces.
- Avoid draping damp clothes or dishtowels over cabinet doors, because excessive moisture can cause permanent damage.

## CABINET CARE AND CLEANING TIPS

Cabinets should be dusted or vacuumed periodically depending on the amount of particulate matter that may have accumulated. Always dust with a polish moistened or damp cloth, as dry dusting may scratch the surface. It is a good practice to follow the grain of wood when dusting, wiping across the grain could cause scratches to appear if the dust contains grit. Residues such as smoke, cooking vapors or body oils can be cleaned with a damp cloth with a small amount of furniture cleaner. Remember to use a clean soft cloth & minimal water.

### Cleaning of Cabinet Finishes used at Home Idea Center

There are three basic types of furniture care products: Silicones, Waxes and Polishes.

Silicone cleaners offer a high degree of shine, the silicone seeps into even the highest quality finishes creating a barrier that will not accept stain or finish. This makes it virtually impossible to re-finish or touch up when it may be required.

All of our catalyzed finishes are durable and hard enough that in most cases they do not require any wax. Waxes should actually be avoided because their regular use may result in build-up wax film on the surface. This build-up could actually attract dirt, smoke and other pollutants in the air, resulting in smudges and streaks. Many waxes contain grit that may permanently damage the surface if used improperly.

Polishes would be the best choice for use. They contain detergents to clean the dirt, emulsifiers give it body to clean and last longer and mineral oils is left behind as a barrier for dirt and moisture while leaving no wax or silicone residue. When good maintenance procedures are followed the finishes used will beautify and protect for years to come.

# Cabinet Accessories

## DECORATIVE HARDWARE:

General cleaning and care instructions for any metal, powder coated, or plated finishes simply include dampening a soft cloth with warm water and gently dabbing any affected areas.

For heavily affected areas, apply soap in moderation. Avoid aggressive chemical solvents, glass cleaners, general kitchen/bathroom cleaners and other abrasive cleansers, as those cleaners could damage the finish.

## INSERTS (trashcan pull-outs, drawer organizers, mixer lifts, etc):

Most of the inserts used at Home Idea Center come from Rev-A-Shelf: <https://rev-a-shelf.com/our-warranty>

## HINGES:

Most of the hinges used at Home Idea Center are Grass brand hinges: <https://www.grassusa.com/>
